

## Michael Bajer: Picture "Disrupted figure no. 8" (2023)

A new work of the series Distracted figures. The woman is realistically depicted in front of a landscape. She poses thoughtfully. Mike Bajer wants to depict the beauty of the subject and the distractedness of today's world through the disrupted elements. The appearance of the subject is thereby rearranged and gives the image new meanings and associations. It is exciting to combine figures with landscapes to offer the viewer an interesting environment and give clues to the figure depicted.
