

Christin Lutze: Picture "Insight" (2023)

€1,900.00

In this painting the urban and architectural space is the central theme of artistic exploration. In this painting Christin Lutze reshapes the architectural space and the landscape into an independent figurative entity. In the foreground there is an old lantern. Her special handling of light and harmonious colors supports flatness or depth, reflects motifs or illuminates hidden corners. Light creates in her painting exactly what could not be so in reality.
