

Nicole Leidenfrost: Picture "Lion abstract" (2017)

€4,900.00

The painting presents a reclining lion that appears to be resting amidst a deep, elegant shade of black. His appearance is marked by dynamic, powerful lines that emphasize the contours of his figure and create an aura of undeniable power and strength around him. The shades of red that shape his coat convey an incomparable warmth and intensity. The cleverly chosen nuances of red give the animal a vibrant presence and lend it an almost luminous appearance against the dark background. The lion's lines are striking and powerful, creating a balance between its composure and dominance. The contrast between the intense red presence of the lion and the deep blackness of the background creates an aura of mystery and grandeur. The painting radiates a calm, yet incredibly powerful energy.
