Christin Lutze:
Picture "St. Mark's Square in Venice" (2024)

€2,400.00

Influenced by the last time he spent working and living in Venice, the Venetian architectural space is the central theme of his artistic exploration. The viewer's gaze is drawn to St. Mark's Square. The artist transforms the space into an independent figurative structure and directs the viewer's gaze to the special and unique city built in the water. Her play with the various harmonious and blue colors and the light is unique and fascinating.
