

Ilona Schmidt: Picture "City dwellers no. X" (2012)

€600.00

In the "Stadtmenschen" series of paintings, strongly abstracted figures are depicted in deep black, standing in front of glowing yellow silhouettes. These contrasts symbolize the pulsating life in the big city, where the darkness of the people is illuminated by the radiant lights of the urban environment. The yellow silhouettes represent the diverse lights and energies that characterize the cityscape - from neon signs to street lamps. The abstraction of the figures leaves room for interpretation and reflects the anonymity and interaction of the city's inhabitants. This visual composition invites the viewer to reflect on the relationship between the individual and urban space and to experience the dynamic atmosphere of a big city.
