

## Ilona Schmidt: Picture "Overlays" (2023)

This is a portrait painted over with overlapping circles. The use of circles that overlap creates a visual representation of an intersection. This representation can have different meanings depending on the interpretation of the viewer. It could indicate the connection or meeting of different aspects or identities. The overlap of the circles could also point to commonalities or intersections between different people or ideas. Image signed and dated and is provided with a hanging.
