

Milena Radic: Picture "Vulnerability of the timeless beauty" (2024)

€500.00

This artwork captures the timeless beauty of a nude woman in a three-quarter pose, her face partially hidden behind the arm she gently rests on her head. Her other hand delicately touches her hip, while her knees are prominent in the foreground. The sophisticated play of light and shadow emphasizes the supple contours of her body and lends the scene a mysterious, pensive atmosphere. The soft pastel tones bring warmth and depth to the work, while the powerful charcoal strokes define the composition. This depiction invites the viewer to discover the subtle balance between strength and vulnerability in the female figure and to appreciate her quiet, expressive presence.
