

Karin Döring: Picture "SUMMER" (2024)

€2,400.00

In this artwork, I worked with a lot of water and green colors to achieve a flowing and dynamic effect. It's fascinating to see what happens in the process when the colors mix freely and find their own direction. I was inspired by my summer garden 2024, which delights me with wonderful splashes of color in every shade of green imaginable. The color energy of this painting has an incredibly positive effect. The strong and vibrant tones of green and yellow, deep blue and strong pink harmonize with each other and create a harmonious atmosphere. This work of art brings joy and vibrancy to any room. The work invites you to feel the creative energy and optimism it radiates. The colors flow freely and remind us how beautiful summer is, how important it is to live in the moment and enjoy the positive aspects of life.
