

## Ella Joosten: Picture "Bouquet Two" (2024)

€1,850.00

In creating this painting, I tapped into the vibrant energy of nature's very own palette. Each stroke of my brush aimed to capture the dynamic essence of blooming flowers, weaving together expressionist vigor with impressionistic subtlety. It is intended to evoke the freshness of spring and the transient beauty of flora. In your space, this artwork will infuse a burst of life, color, and emotional richness, reminding one of the timeless dance between growth and decay in nature.
