**Picture "Taurus I" (2022)**

**€2,500.00**

The bull depicted symbolizes strength, power and dynamism on the one hand and on the other hand the animal still used in bullfights, which is representative of the instrumentalization of many animals for the purposes of humans. The often taken-for-granted assumption that humans have the greatest rights due to their superiority and that nature must subordinate itself to needs is to be questioned. Topics such as mindfulness and the interaction of all living beings with each other, are the central question of this work. Acrylic paint, tissue paper, plastic masses, oil pastels and graphite were used for this mixed media work. The painting has texture due to the plastic masses used and the tissue paper. The varnish is matte.
