

Ilona Schmidt: Sculpture "In dialogue" (2023)

In dialogue is a highly abstracted pair of sculptures made of stoneware mass, sitting on a pedestal and giving the impression of being in conversation with each other. The two figures radiate a certain liveliness and seem to have a deep connection to each other. The figures were finished with cold patina after firing. The base is wood and the color scheme is a blue-gray. For better size comparison, the couple is sitting in a photo in front of a picture, which is not part of the offer, the dimensions of the picture are 60 x 80 cm. The figures are not firmly attached to the base.
