

Susanne Immer: Sculpture "Hug" (2021)

€4,900.00

Embrace a gesture of familiarity, affection and friendship but also lovers sometimes feel a distance. The work Embrace is bent from an aluminum strip. The line arcs are always at a distance from each other. The viewer is invited to vibrate the work by touching it. This gives the impression of a brief overcoming of distance, depending on the impulse hesitant, anxious or even brash and determined, until the swinging comes to rest again - and a new impulse, a new impulse creates a new rhythm of movement.
