

Ilona Schmidt: Sculpture "Rocketman" (2023)

€790.00

Work from my series "Bodies and fragments". The "Rocketman" is modeled from stoneware mass and is positioned in an old weaver's shuttle. He was treated with cold colors after firing. He enjoys a place on the wall, but can also be placed lying down. He is firmly attached to the weaver's shuttle and provided with a hook, so he can be hung up immediately.
