

Mirek Gasz: Picture "The gorilla" (2022)

€2,900.00

Life has its own perspective for everyone. It is always in motion. The figures are arranged individually, each person has their own perspective, so there is no up or down in this painting. Colors and shapes clash in contrast. The people influence each other. They are all connected to each other. The gorilla, a strong animal, is nevertheless the weakest of the figures. "The Gorilla" is a strong and controversial painting about the complexity of life.
