

## **Toni Nohe: Picture "Breathing in the deep sea" (2022)**

This abstract painting with predominantly blue tones gives the feeling of a deep and calm sea, as if entering a pleasant dream. The contrast and focus are given by the colored circles, reminiscent of air bubbles: vital oxygen. In a calm sea, the power and vitality of this oxygen move upward, as if searching for something, actively seeking a path, pursuing a dream. With this painting I wanted to create a pleasant, meditative mood in which the viewer feels that from this calm is drawn the vitality to continue and pursue their dreams.
