

## KNÖ-REI: Picture "641.20.23" (2023)

€1,200.00

In my work, I have created a mosaic of emotions that captures the diversity of life and is an expression of my passion for the question of the infinite. Colorful geometric construction and minimalist purity merge into a captivating whole. The black forms a striking contrast to the clear, bright colors and the small squares and rectangles arranged in a straight line. With this work, I dedicate myself to the theme of the "infinity of time". My personal answer to the question of time is contained in the picture. Even without any interpretation of the content, the work is a harmoniously elegant wall decoration that enlivens many rooms. I used a particularly fine, smooth canvas for this work. The work can be hung in 3 different directions.
