

Michael Rofka: Sculpture "Stone flower" (2024)

€2,400.00

The artist created this graceful little sculpture from a single piece of alabaster. He gave the light-colored, almost transparent stone a complex, organic form with openings. It is not figurative, but certainly offers various associations. The artist's aim was to make the stone blossom without depicting a flower. The sculpture is mounted on a dark piece of stone. The dimensions are without this block of stone.
