

Uli Fischer Art: Picture "MENTIS FEMINA" (2023)

This pretty woman somewhat apart but still friendly and expressive has been painted by me with many cubic elements. Very strong colors are here, of course, also with it and should immediately integrate the painting with a look. Especially the strong eyes and the prominent lips have been created on this image very impressive. In the creation of this artwork, there have already been the first spring colors in nature at Lake Constance and these have inspired me very much. This is art from the beautiful Lake Constance Your Uli Fischer
