

## Uwe Fehrmann: Picture "Quo vadis? No. 4, Leopard" (2023)

This painting belongs to a series of paintings that focus on endangered species. The leopard ( *Panthera pardus* ) is one of the five extant species of the genus *Panthera*, a member of the cat family *Felidae*. It occurs in a wide range in sub-Saharan Africa, parts of western and central Asia, southern Russia and on the Indian subcontinent to Southeast and East Asia. It is listed as Endangered on the IUCN Red List because leopard populations are threatened by habitat loss and are declining across much of its global range. (Source: Wikipedia)
