

Anne Samson: Picture "Golden forest" (2024)

€1,190.00

A hike through the Hauswald forest inspired me to paint this picture. Trees through which the golden sun shines, bare trunks, undergrowth and foliage on the forest floor. Everything is interpreted in an expressionist manner with the emphasis on strong color and the reduction of forms to the essentials. The density of the forest and the shimmering light are in the foreground. A feast of color!
