

Ilona Schmidt: Sculpture "Traces of time II" (2024)

€890.00

The figurines entitled "Time Traces II" invite the viewer to immerse themselves in the multi-layered relationship between time and memory. Each work explores in a unique way how past experiences and emotions reverberate in the present. Each rust stain and imperfection can bear witness to the conditions the material has been exposed to - be it weathering, the influence of time or human activity. These surfaces can evoke memories of old machines, abandoned places or even nature itself. The heads have been treated with a rust patina after firing. They are suitable for outdoor use, but color changes may occur due to the rust surface. As rust is a natural material, it can change its surface when exposed to water.
