

Karin Döring: Picture "NAKED" (2023)

€2,800.00

NAKED is a profound contemplation of female nature manifested in the depiction of a stripped down portrait. The artwork explores the duality of the human condition: sheer vulnerability and inherent strength at the same time. In the nuanced shades of black and white, I capture the essence of the female being, free of any adornment or concealment. The painting inspires a multitude of interpretations: the naked truth we seek to hide, the strength that comes from accepting the self, or the isolation that can come with revealing our true selves. "NAKED" is an invitation to look beyond the layers we build around ourselves and consider the complexity of being human in its purest form.
