

Anja Struck: Picture "Behind the mountains" (2015)

€2,000.00

This image has a strong atmospheric density. In the background the mountains, in the foreground rather a dry steppe landscape with grasses in brown, yellow tones held. The beautifully impasto paint application makes the image very lively. The fine color nuances, especially the grasses attract the viewer's gaze again and again almost magically. There is much room for own interpretation. The picture is signed on the back.
