

Ilona Schmidt: Sculpture "Unveiling IV" (2018)

€750.00

Unveiling No. 4 was modeled from clay and fired. After firing, the sculpture was given a unique coating of textile strips, giving it a special texture and visual depth. The back of the sculpture is deliberately left open to symbolize a playful unveiling. The unveiling invites curiosity to explore what is hidden. The sculpture has been finished with cold patina, is signed and stands on a metal stand. The dimensions include the stand.
