

## **Anja Struck: Picture "softly rippling the waves" (2021)**

The picture shows a bench from behind. The view from the bench goes to the sea. The picture shines from the inside. The sun seems to set, its intense rays illuminate the sea, the bench, the grasses and also the individual branches of a tree that can be seen on the right and left at the edge of the picture. The clouds in the intense blue sky are also illuminated. The viewer feels invited to sit on the bench, look at the sea and dream. A very atmospheric picture.
