

Nicole Leidenfrost: Picture "Two Faces" (2025)

€5,800.00

"Two Faces" - The duality of the self Two faces, interwoven yet contrasting, peer out from an explosion of intense colors. "Two Faces" plays with the idea of identity, self-perception and the many roles we take on in our lives. The powerful, expressionistic brushstrokes blur the boundaries between inside and outside - a reflection of human complexity. Are they two individuals or two sides of one soul? The work invites the viewer to explore their own duality and lose themselves in the colors and shapes.
