

Ulla Kutter: Picture "Sea" (2018)

€4,000.00

Ulla Kutter paints the sea, just the sea - without a ship or other elements. The painter has focused entirely on the structure of the waves and - above all - on the different shades of color of the sea. She found areas shone by the sun and lying in the shade. there are many areas in warm and cold shades of gray but also turquoise, petrol, soft light green and even purple in the sea. The claim of the image is to be able to have a piece of the sea in the room. This is fully succeeded with a painting with oil paints in two layers of color.
