

Karin Döring: Picture "DANCE OF FLOWERS ON WATER" (2023)

This artwork is an explosion of color and joie de vivre. With strong turquoise, purple and pink tones, I express my colorful and loving view of nature, especially flowers. The abstract shapes merge together so that they almost seem to dance like flowers on the canvas. Immerse yourself in a world full of beauty and joy and feel the vibrancy of life. For me, the intense colors represent the energy and vitality that nature embodies. I use them to create a powerful dynamic that envelops the viewer with warmth and the feeling of a spring awakening. The colors and shapes convey joie de vivre and optimism and fountain the room with positive energy.
