

Janina Lamberty: Sculpture "Snapshot I" (2024)

€850.00

SUBTLE ASSEMBLAGES OF CHANCE Janina Lamberty's works are about the transience of the moment and the concentration on a very specific moment, such as in Japanese Zen archery. By consciously using chance as a creative principle, Janina Lamberty sees herself in the tradition of modern art, which is convinced of the equal value of the creative and the found, the rational and the unconscious.
