

Michael Becker: Picture "In the vegetable patch" (2021)

€2,300.00

The picture "In the vegetable patch" consists of an imaginative combination of women's bodies, plants and small animals. A snail with leaf feelers is enthroned on a leek bulb in female form. Next to it a germinating bean, and a yellow-black caterpillar seeks its way. The image content doesn't have to make sense. I have drawn it mainly with ballpoint pens on surfaces previously primed with airbrush.
