

Karin Döring: Picture "FLAMINGOS DIVERSITY" (2024)

The work celebrates diversity. A human portrait at the center, surrounded by the wild grace of two flamingos - symbols of the exotic and the unique in nature. The contrasting splashes of color of the flamingos on the monochrome background and the play with perspective and space illustrate the beauty that lies in the fusion of differences. This picture embodies the idea of diversity by combining different elements into a harmonious whole. The artwork is signed and dated on the back.
