

Stefanie von Quast: Sculpture "Selfie Queen" (2020)

€1,800.00

The Selfie Queen is a young woman in line with the zeitgeist. A well-known influencer who photographs herself in beautiful surroundings with her latest outfit for her hip fashion blog. The posture of the bronze figures is very important. There is often more expression in body language than in verbal communication. As much as possible Stefanie von Quast creates her bronzes herself, the model, the mold making, the wax models and after the casting the chasing and patinating. She leaves the bronze casting to an art foundry near Munich. Thus, she has the opportunity to change and improve something at every step of the process.
