

Ute Bivona: Picture "Let It Flow" (2022)

€3,500.00

A thoroughly "explosive" work that marks exactly the moment when you realize that you should just let go of everything, that you should just let the energy flow. Letting go is the motto. And when this knot is burst, this spark of realization becomes conscious, that already equals an inner explosion. The different layers are applied from dark to light and always need drying times, successful Unterbrechnungen, which allow me to think about the next steps. The different brightnesses, values, the alternating flat and linear sections, the scratches in the still wet paint, the neutral in contrast to bright and vibrant neon colors create tension and combine to form an expressive and energetic overall composition.
