

Ute Meyer: Picture "Water reflections 1" (2022)

This picture was taken at the end of July in Ute Meyer's garden. The bright yellow flowers of the ligularia and the purple willowherbs are reflected in the water. Light blue cranesbill grows on the right side of the pond. The structures of the impasto brush application give the vegetation picture plasticity and liveliness. The picture support is a white primed wooden box, 5 cm deep with a steel cable as a suspension.
