

Martina Rick: Picture "the gate" (2013)

€4,200.00

I find the creation of a new work of art an exciting and exhilarating experiment. Shapes and surfaces that arise spontaneously from the process are applied in layers. The resulting structural color information communicates on several levels. Through my way of working, the images experience themselves in the 3rd dimension. A depth is created that shows the viewer outdated life, filled with all the emotions that go with it.
