

Uli Fischer: Picture "FEMINA VIRES" (2022)

FEMINA VIRES is a very colorful painting of my series "Woman Style". Beautiful women are something wonderful and I have tried here many colors together to create an eye catcher. The image is very large with its masses 150x100 and it certainly has sometime on a beautiful wall his optimal appearance. It was created in autumn 22 with the impressions of the sunny and colorful October, I think some of these colors can be found here now. I hope the facial expression has become as strong for the viewer as I feel it. I have had a lot of fun in errschaffen this image. Have fun & greetings from Lake Constance Your Uli
