

Ella Joosten: Picture "Reflection 17" (2024)

€2,010.00

In this painting I have captured the tangled, outstretched branches of trees against a vibrant, swirling sky. With acrylic paint I have expressed depth and emotion by combining expressionist and impressionist techniques. This creation represents the struggle and beauty of growth, symbolizing our own life paths as they unravel against the great unknown. This work brings a dynamic, hopeful energy to any space, a reminder of the resilience and beauty of life.
