

Uli Fischer Art: Picture "ELEPHANTI" (2022)

Again, a very modern and typical Uli Art design painting. Cubic and colorful segments show a very expressive strong elephant. Elephants are among my favorite animals in nature, they have an incredible charisma and are of course also very smart. Please protect the animals. I designed and painted the picture with a lot of joy and had a lot of positive thoughts in me. I hope that can be seen well and brings this positive energy to the viewer further! The picture should be fun and bring joy and decorate a beautiful room decoratively. Acrylic / 2022
