Julia Pasinski:
Picture "Gray geese" (2019)

€750.00

The painting presents two gray geese in almost photorealistic precision, depicted in their natural pose and expression. The birds, in their typical posture with heads raised, almost seem to study the viewer, creating a connection between the image and its viewer. This contrasts with the blurred background, which flows in soft gradients of color, drawing even more focus to the gray geese. It is dated and signed.
