

Ilona Schmidt: Picture "Facial landscape no. 5" (2016)

€1,300.00

Work from my series Facial Landscapes. In this work I have worked with acrylics, stains, pigments and fillers to create a powerful texture. The organic form and earthy colors represent growth and change. It is a living work, with an interesting texture and depth of color. Due to the amount of putty, the work has a greater weight and the canvas cannot be stretched afterwards. Work dated and signed.
