

su sea: Picture "Lion I - PRIDE" (2023)

€2,800.00

The depicted lion with a proud look (PRIDE!), above which hovers the question "in which world do we want to live?" is representative of our great animal world, which is affected by human behavior in its natural habitat. The image, in addition to the image of the lion in black and gray tones, should make the viewer think, make it clear that each INDIVIDUAL has it in his hands, through his behavior, to make the world a little bit better..... For the mixed media work acrylic paint, tissue paper, oil pastels, graphite, plastic masses and for the background collaged newspaper clippings were used.
