

Ilona Schmidt: Sculpture "Traces of time I" (2024)

€890.00

The abstract heads entitled "Traces of Time" invite the viewer to immerse themselves in the multi-layered relationship between time and memory. Each work uniquely explores how past experiences and emotions reverberate in the present. Each rust stain and imperfection can bear witness to the conditions the material has been exposed to - be it weathering, the influence of time or human activity. These surfaces can evoke memories of old machines, abandoned places or even nature itself. The heads have been treated with a rust patina after firing. They are suitable for outdoor use, but color changes may occur due to the rust surface. As rust is a natural material, it can change its surface when exposed to water.
