

Dorothe Willeke-Jungfermann: Sculpture "On the beach" (2024)

€950.00

The inspiration for this painting came from long, summery walks along the beach on the island of Sylt. Pure vacation feeling and enjoyment. Every lover of the sea will be moved by the gentle or powerful waves, with white whitecaps dancing on their crests. Long sandy beaches, shimmering from beige to yellow depending on the time of day. The "On the beach" wall sculpture consists of 5 canvas triangles screwed together. The screws can also be removed to hang the elements individually. Painted in acrylic in off-white, blue, beige and yellow. For the wall sculpture with its different heights, you need a surface with a maximum width of 75 cm and a maximum height of 70 cm.
