

Julia Pasinski: Picture "Resting cranes" (2023)

The image shows five cranes resting in the middle of a damp field shrouded in mist. The fog, diffuse and almost tangible, envelops the scenario in a delicate veil, giving the environment a mystical and timeless character. The cranes, with their slender forms and striking contours, appear as silent guardians of this dreamy place. Their long legs are anchored deep in the damp earth, while their necks soar in elegant arches. Their calm, almost meditative postures make them appear like sculptures carefully placed in this foggy landscape. The faint light breaking through the mist gives the birds' feathers a delicate glow, gently setting them apart from the muted background. The painting is signed on the front and back. It is also dated on the back.
