

Mark Hellbusch:

Picture "Kitchen party" - abstract painting in neon colors" (2023)

€2,500.00

A source of inspiration in art: the paint box - with painting in neon colors. The mental leaps that the paint box as a symbol creates, go in the direction of childhood for many viewers. The title "Kitchen Party" is an invitation to direct their own associations in a different direction, without losing the personal touch. The paint box in neon colors becomes a source of inspiration - from concrete to abstract. The paint box becomes art. The juxtaposition of graceful color surfaces creates fields of tension in form and color. Through experimental painting on the oversized paint box, modern abstract art is created as a wall sculpture. The result of the experimental painting, the symbolic power of the color box as well as the assistance of a title ("Kitchen Party") invite to associate. The imagination - once triggered - can be stimulated in many ways in the viewer.
