

Ilona Schmidt: Sculpture "Rule the waves" (2023)

€1,600.00

The Rule the Waves sculpture captures the dynamism and unpredictability of the sea. A small ship despite the churning waves, a symbol of courage and resilience. The wave formation, represented by a curved piece of wood, emphasizes the raw energy of nature. The sail, made from found wood, lends the work an organic aesthetic and is reminiscent of the close connection between man and the elements. The crew, reduced to abstract shapes made of stoneware mass, reinforces the feeling of uncertainty - as if they are in constant battle with the forces of nature. Rule the Waves is not just a depiction of a ship on the high seas, but a metaphor for perseverance in stormy times.
