Ute Bivona:
Picture "Spectacular, spectacular!" (2022)

€8,500.00

What an expression of joie de vivre! In this wonderful work, the artist has taken on two challenges at once: first, the large format, which must result in an exciting and meaningful overall composition, and then the strongest contrast of the two parts of the diptych - black and white! The title already says it: you should enjoy EVERY moment of your precious life and enjoy what you have, night as well as day, summer as well as winter, then life becomes spectacular. This is exactly how one should understand these two parts of the whole. The tension and depth is created by the different layers of brightness, warm versus cool and neutral versus bright colors. The alternation and division into areas, interrupted by thin lines also supports this effect. A firework of joy and energy!
