

Evgenija Koch: Picture "3D_2.0" (2022)

€3,360.00

A new series of artworks 3-dimensional space. Design, creation and presentation of the elements reflects the living and related to the reality of life. A translation of sensual and aesthetic experiences with the encounter with things is expressed in pictures in a painterly way. In this painterly process, the artist concentrates on a virtual object of observation, in order to perceive it arbitrarily and consciously. In the contemplation, impressions are collected and meaningfully classified, what is seen is described and translated into other aesthetic forms of expression. The basic structures of a picture order are recognized with developed beginnings color effect. However, the exciting thing is: pictures to pictures are put into relation. Images not only design, but reflective and experiential encounter, relate to the reality of life.
