

Ro: Sculpture "Female nude" (2022)

€890.00

The sculpture "Female Nude" was handmade from a soft type of stone. This sculpture is a mixture of an abstract and a representational style. In this stone I saw a female body. And then the stone got its shape. The sculpture shows a lower part of the female naked body. You can see the buttocks and legs of a lying woman. This stone was worked partly realistic and partly smooth, especially the legs. The natural part of the stone reinforces the impression of the smooth body. The color of the stone is pink and very similar to the skin tone. The lower back side is natural. The sculpture has no base and can lie on a surface such as a table.
