

## **KNÖ-REI: Picture "602rel-GK" (2023)**

**€2,400.00**

I have created a geometric composition that at first glance is reminiscent of English fabric patterns. However, it invites the viewer to philosophical reflections on space and reality. In my work, geometric shapes, colors and surfaces merge into a metaphysical minimalism. With a special pictorial design, I allow the viewer to enter the world of optical effects. You think you see the motif blurred, but everything is precisely planned and precisely painted. Here I have painted over one of my existing paintings and deliberately used the existing painting structures. The partial high-gloss varnish adds glossy accents that keep changing. My passion for clear design and deep meaning pulsates in every corner of this painting, adding powerful energy and modern aesthetics to a room.
